Haters gonna hate. And **Demi Lovato** is gonna laugh in their faces. The pop singer turns action hero in "Sorry Not Sorry," which dropped at the stroke of midnight.

The "Confident" singer is in battle-mode on her latest number, which is produced by Zaire Koalo, Trevor Brown and Warren "Oak" Felder and is bound to be embraced as a girl-power anthem.

On it she sings, "Payback is a bad bitch/And baby I'm the baddest/You fuckin with a savage/Baby, I'm sorry (I'm not sorry)."

Today was the big reveal for a track Lovato had [teased on her social media accounts](#) with instrumental snippets and title clues. It's the first song lifted from her upcoming sixth album due out later this year, a set which should be "more soulful" with R&B touches to it, she recently told *Billboard*.
